An to the Kjeaasen Norwegian Language

The Kjeaasen Norwegian language is a variant of Nynorsk, one of the two official written standards of Norwegian. Nynorsk was originally developed during the late 19th century as a literary and academic language based on the dialects of the rural population of Norway, in distinction to the other official standard, Bokmål, which is primarily based on the Copenhagen dialect of Danish.

Kjeaasen Norwegian is named after the linguist Ivar Aasen, who spearheaded the development of Nynorsk. Aasen believed that a standardized written language based on the dialects of the Norwegian people would help to preserve and strengthen Norwegian culture and identity, which was under threat from cultural pressures from neighboring

Denmark and Sweden, as well as from the trend towards urbanization and industrialization.
