- **Use ample white space:** Negative space provides visual breathing room, allowing your content to stand out.

- **Learn the color wheel:** The color wheel organizes colors based on their relationships. Use it to create harmonious color combinations.

- **Consider color psychology:** Different colors elicit specific emotions. Consider the psychological impact of colors when making your choices.
- **Experiment with contrast:** Contrasting colors create visual interest and draw attention to important elements.

4. Image Selection: Choosing the Right Visuals

Images have the ability to convey complex messages instantly. Select images that are relevant, high-quality, and visually appealing.
